Commissioner of Patents and Trademarks  
Washington, D.C. 20231

AMENDMENT AFTER ALLOWANCE UNDER 37 CFR §1.312

Please amend the above application by substituting the following  
abstract for the abstract which was added to this application in the July 3,  
2001 Notice of Allowability:

CI  
A projection lens for use with LCD panels is provided. The lens has a  
first lens unit which includes a strong negative lens element having an  
aspherical surface which provides distortion correction, and a second lens  
unit which includes a first lens subunit separated by an airspace from a  
second lens subunit, wherein the first lens subunit has a strong positive  
power and the second lens subunit has a weaker power. The second lens  
subunit can include a negative lens element, followed by a positive lens  
element, followed by a plastic lens element having an aspherical surface.  
The projection lens has a field of view of at least 35° so that the overall  
projection lens system has a compact size.
